

*The set of convex central configurations of the 4-body problem*

Montserrat Corbera, Universitat de Vic

*E-mail address:* montserrat.corbera@uvic.cat.

In this talk we will summarize the known results on convex central configurations of the 4-body problem. Using appropriate coordinates we will describe the set of realizable 4-body convex central configurations and we will show which convex quadrilaterals are not realizable as central configurations.
