### Objectives

The First Annual Barcelona Computational and Systems Neuroscience conference is an opportunity for members of the computational and systems neuroscience community here in Barcelona, and those of related fields, to get to know one another better. Our goal is to provide an open and relaxed forum for everyone to talk science and discover the work being done by our fellow researchers in this growing field. We plan on having over twenty oral presentations as well as two poster sessions, spread over two days in the idyllic setting of the Institut d'Estudis Catalans, in the heart of downtown Barcelona.
